AB A method for stabilizing intestinal bacteria comprises mixing the bacteria

with powd. substances followed by covering the mixt. (as a core) with powd. fats with a m.p. of >40.degree.. The coated bacteria can be stored for a prolonged period in food products. Streptococcus faecalis was

mixed

with powd. hardened rape oil and CaCO3 and used as a core in manufg. aq. yogurt contg. live bacteria 4.2x105/g. The live bacteria in the yogurt after 1-mo storage ws 8.2x104, as compared to 104/g of the prior arts.

ST intestinal bacteria stabilization; Streptococcus stabilization core

IT Chewing gum

Dough

Mayonnaise

Orange juice

Shortening

RL: BIOL (Biological study)

(intestinal bacteria for, stabilized)

IT Bifidobacterium longum

Enterococcus faecalis

Lactobacillus acidophilus

(stabilization of, as core substance, in food manuf.)

IT Rape oil

Soybean oil

RL: BIOL (Biological study)

(hydrogenated, powder, intestinal bacteria as core substance

stabilization by, for food manuf.)

IT Frozen desserts

(ice cream, intestinal bacteria for, stabilized)

IT Bacteria

(intestinal, stabilization of, as core substance, in food manuf.)

IT Cream

(sour, intestinal bacteria for, stabilized)

IT Cream

(whipping, intestinal bacteria for, stabilized)
IT Frozen desserts
Milk preparation
(yogurt, intestinal bacteria for, stabilized)
IT 471-34-1, Calcium carbonate, biological studies 31566-31-1
RL: BIOL (Biological study)
(intestinal bacteria as core substance stabilization by, for food
manuf.)
